Career Objective

Started my journey with programming fundamentals, building a strong foundation in problem solving, OOP, and database design. Then progressed to desktop development using WinForms and ADO.NET to strengthen practical software development skills. Transitioned to backend development with ASP.NET Core, focusing on building scalable systems and real-world applications. Developed multiple production-level projects including a Clinic Management system and an E-Commerce platform, and currently seeking an opportunity to grow as a Backend Developer and contribute to impactful software solutions.

Core Skills

- **Backend Development:** ASP.NET Core, Web API, Entity Framework Core, ADO.NET
- **Architecture:** Clean Architecture, SOLID Principles, 3-Tier Architecture, Repository Pattern, Unit of Work
- **Security:** JWT Authentication, ASP.NET Identity, Role-Based Authorization
- **Databases:** SQL Server, MySQL, Database Design, Normalization
- **Programming Languages:** C#, C++, SQL, JavaScript
- **Frontend Basics:** HTML, CSS, Bootstrap, js
- **Tools:** Visual Studio, Git, GitHub, Postman, Swagger
- **Core Strengths:** Strong OOP foundation, Data Structures, Database Design, Clean Code, Scalable System Design

Projects

TechStore – E-Commerce Platform Jan 2026 – Present — ASP.NET Core 9.0, EF Core, SQL Server, Stripe
- Built a scalable hybrid architecture system (MVC + Web API) supporting web and mobile clients
- Implemented JWT authentication with role-based authorization
- Integrated Stripe payment gateway with full order workflow automation
- Developed 10+ RESTful APIs for authentication, products, cart, and orders
- Applied Clean Architecture across 6 layers for maintainability and scalability
- Built full admin dashboard with real-time business analytics

GitHub: github.com/mohamed68909/TechStore

Clinic Management System API Sep 2025 – Dec 2025 — ASP.NET Core Web API, EF Core, SQL Server
- Designed and developed 15+ RESTful API endpoints for doctors, patients, and appointments
- Improved system performance by ∼40% using pagination and filtering
- Implemented secure authentication and role-based authorization using JWT
- Applied ownership-based access control for data security

GitHub: github.com/mohamed68909/ClinicManagementAPI

Driver License Management System Dec 2023 – Apr 2024 — C#, WinForms, ADO.NET, SQL Server
- Built desktop system for managing license issuance, renewal, and replacement
- Implemented full license lifecycle management system
- Applied 3-Tier Architecture for separation of concerns
- Added logging system for tracking operations and users

GitHub: github.com/mohamed68909/DriverLicenseManagment

Training

Software Engineering Self-Study Program (Programming Advices Platform) Jan 2023 – Present
- Completed an intensive learning journey under the mentorship of Eng. Mohamed Abu Hadhoud
- Built strong foundations in C++, OOP, Data Structures, and Database Design through hands-on practice
- Studied and implemented RESTful APIs, authentication, authorization, and security concepts
- Transitioned from desktop development (WinForms, ADO.NET) to backend development using ASP.NET Core
- Developed real-world systems including a Driver License Management System

Information Technology Institute (ITI) – .NET Web Development Trainee Jul 2025 – Aug 2025
- Completed 162 training hours covering SQL Server, C#, LINQ, Entity Framework, and ASP.NET Core MVC.
- Built a full MVC-based web application applying backend development concepts and best practices.
- Gained hands-on experience in database design, server-side development, and real-world problem solving.
- Introduced to freelancing fundamentals and software development lifecycle (SDLC).

Education

Port Said University
Bachelor of Information Technology Systems Expected Graduation: 2026
GPA: 3.4/4.0

Languages

Arabic (Native) English (B1)
